THE FUTURE OF REHABILITATION WORKSHOP 17TH JULY 2018

What's New in Upper Limb Rehabilitation

Come and learn how the latest technology in robotic and computer assisted devices is changing the way we treat clients.

This course aims to give you strategies to mix conventional therapy with computer assisted and robotic therapy techniques and how these interventions have the potential to enhance neuroplasticity and motor recovery. This one day workshop includes hands-on experience with Tyromotion devices and participants.

Morning Tea, Lunch and Afternoon Tea provided.

Learning Outcomes

- Provide knowledge on the evidence for Robotic & Computer Assisted Therapy
- Introduction to Tyromotion robotic therapy
- Understand the current upper-limb treatment techniques & the integration with Tyromotion
- Learn about case study examples for goal-oriented intervention planning
- Practical Session with participant volunteers - to be able to provide assessment, goal setting & intervention

Presenters & Trainers

- Guest Speaker Carolyn Smith - Tyromotion Specialist
 Kate Contos - Occupational Therapist
 Declan Wode - Physiotherapist
 Melanie Clair - Occupational Therapist

CPD points - 6 hours

We are proud to support rehabilitation and healthcare industry through education, training and professional development.
